## **LOOKING AHEAD**

### **Shell to stage Make the Future Thailand event**

3B The Shell Company of Thailand Ltd will host Make the Future Thailand in Bangkok from January 19-21, at the Quartier Gallery in EmQuartier. This exhibition will feature innovations in energy, technology, mobility, and futuristic cars, together with the direction of energy utilisation in 2050 to cope with future energy challenges.

"Experience aspects of a future world at Make the Future Thailand, which will demonstrate how we can achieve a sustainable future," the company said.

"The exhibits include Thailand's Energy Challenge and Bangkok 2050: Container of Possibility, with future technology and innovations for the home which will be shown for the first time in Thailand; a race car powered by saltwater; along with the latest 14 Eco-marathon vehicles designed by Thai university students, which will enter Shell's regional competition in Singapore along with teams from 18 countries; and the presentations from the Imagine the Future competition by university student teams."
