

**ENERGY WEEK****Banpu Infinergy to showcase solar energy solutions**

Banpu Infinergy Company Limited, a one-stop service provider of total solar energy solutions and a subsidiary of Banpu Public Company Limited, the leading integrated energy company in Asia-Pacific, will showcase its solar energy innovations at the Asean Sustainable Energy Week 2018 from 6-9 June at the BITEC Bangna Exhibition Centre.

Visitors to the Banpu Infinergy booth will have the opportunity to understand and experience the inner workings of solar energy innovations through virtual reality technology. Through interactive touch screens and visually appealing graphics, the interactive floor zone at the Banpu Infinergy booth is designed to encourage visitors to learn more about the key elements of the Smart Community concept and the ways in which the adoption of technology can efficiently help manage energy use.

Somruedee Chaimongkol, chief executive officer of Banpu Plc and director of Banpu Infinergy Co Ltd said: "We are delighted to join the Asean Sustainable Energy Week 2018 to drive Thailand's development towards the Smart Community vision. Under Banpu Group's Greener and Smarter strategy, we are also committed to helping the country and the Asia-Pacific region's transition to a future of energy sustainability through our energy solutions that are affordable, reliable and eco-friendly.

Visitors to the Banpu Infinergy booth will see the potential of the Banpu Infinergy team, our expertise in solar energy innovations and our strength in providing a customer-centric One Stop Service."

In addition to showcasing technologies and smart electric vehicle energy solutions, Banpu Infinergy will be offering a variety of one-stop solar energy service packages such as the Signature Infinergy Package, the Smart Infinergy Package and the Simple Infinergy Package, all catering to customer needs across different industries.
